題名	Learning Support Systems for Novice Programmers
掲載雑誌	117th International Conference on Education and E-Learning
著者	Masayuki Arai
概　要	We developed several learning support systems for educating novice programmers. The present paper introduces the following three systems: a system by which novice programmers can learn tracing in C++, a system by which novice programmers can learn tracing for Java applets, and an Eclipse plugin tool for learning programming style of Java.
